

National Heart
Centre Singapore
SingHealth

FOREWORD

Heart disease is one of the major causes of deaths in Singapore. Fortunately, the advances in care now allow patients to benefit from improved outcomes.

At National Heart Centre Singapore, our team of experienced specialists is committed to delivering the best possible care to our patients. Managing the highest volume of complex tertiary procedures and patients in Singapore, our multi-disciplinary team of doctors and their diverse cardiac subspecialties allow us to treat the full spectrum of heart disease, in particular, the more complicated cases to ensure that heart patients receive optimal outcomes that will give them a better quality of life post-treatment.

We have put together this directory of our services and specialists, for you to better understand our clinical strengths and whom you can refer your patients to for specific heart conditions.

We look forward to working with you to bring forth the best care possible for our patients.

Yours sincerely,
Prof Terrance Chua
Chief Executive Officer
National Heart Centre Singapore
